

ISLAND PURE

Important Note

During an outbreak of a new virus like COVID-19, no products exist whether it be a surface disinfectant or an air treatment device that can make claims to kill or capture the virus. This is due to the simple fact that the virus was not available to test, and it can take more than 1 year to get a viral claim approved by a regulatory agency.

For this reason, the U.S. enacted a 'hierarchy-based' policy. Should a company's product be found to be effective against harder to kill or capture viruses, it is likely to kill or capture a virus like COVID-19. A product that is likely to provide the greatest protection to you from COVID-19 will have claims against at least one non-enveloped virus such as Norovirus, Feline Calicivirus, Poliovirus, Rhinovirus or Reovirus.
